

- It is very great thing, if I don't have not a **BIG** capital ;D

Overall Tips:

1. Rule

Be profitable

- Try it and if you are profitable and your **win rate** is above 50% or **high**, you are profitable (Iam)
- Time limit: Unlimited, so no 10% per month ;D

2. Rule

Have a trading plan

- **HAVE A STRICT TRADING PLAN !!!**
- Don't have big expectations of being successful in trading, while getting funded.
- Non of that can be done, when you are bad (But I'm not XDD ;D)

What to trade

- When ? (session)
- What ? (pair)
- How you are going to be trading ? (edge)

You have to have exact things straight:

- Session
- Edge
- Risk percentage
- Pair

3. Rule

Risk Managment

- **Most important lesson of all of it ! ! ! !**
- Do not **Full-PORT !!!**
- Depends on the firm to firm

What to focus on ?

- Daily Drowndown
No daily drawdown
- Max Drowndown
10%
- Watch out of spread !
- Number of trades wat are you taking !

-
- Ked som **Profitable**, tak nasledne potrebujem len **Risk Managment** a potom trading plan je to okej :thumbs_up

4. Rule

Psychology

- Fearful of trading
 - Over Confident
 - Be confident about your trades ;D
 - Stop Loss without being fucking scared of losing your funding account
-

- **WE SHOULD NOT GET BEING GREEDY!**
-

- While being greedy, **fucking** up **Risk Managment**
 - Psychology is little boost into it, by not fearing being on funded, we can follow risk managment, that edge / trading plan and **BOOM**, easy work
-

Take it still like learning a skill, **not** making **money**

- If you follow all of these things, you are ready to pass a **funded account**
